

HISP Solutions

Empowering Secure, Efficient Health Data Exchange

DataMotion: The Interoperability Expert

In the complex world of healthcare, seamless and secure data exchange is vital. As a leader among Health Information Service Providers (HISP), DataMotion offers a sophisticated suite of services tailored for the intricate needs of healthcare providers, payers, and patients. Our legacy of over 20 years in regulated industries underpins our expertise in handling sensitive health information with utmost security.

Direct Secure Messaging

Direct Secure Messaging by DataMotion is a pivotal component of our HISP solutions, designed as a secure, email-like protocol for confidential data transfer. It is fortified with digital certificates and Public Key Infrastructure (PKI) to ensure military-grade encryption and data privacy.

Tailored for Healthcare Professionals

Our solutions connect effortlessly with patient and provider applications, EHRs, and other healthcare solutions. They are ONC Certified, DirectTrust™ HISP/CA/RA accredited, and HITRUST CSF® certified, making DataMotion a name synonymous with trust and compliance in the healthcare sector.

Discover JenAI Assist™

our newest addition revolutionizing customer engagement with AI chat, smart forms, expert support, and secure messaging in one seamless solution. Easily integrates with major systems, ensuring secure and flexible deployment to meet your business needs.

Benefits

1

Robust Data Processing

Securely handle millions of records daily with our Zero-Trust platform.

2

Vast Exchange Network

Access to 2.7 million DirectTrust addresses and over 5.3 million NPI addresses.

3

Unmatched Uptime

Dependable HISP services with 99.9% uptime and robust redundancy.

4

Integration Made Easy

Full lifecycle RESTful APIs for smooth integration with various healthcare workflows.

5

Ironclad Security

Zero-trust security model with military-grade encryption ensures data integrity.

6

Verifiable Compliance

HITRUST, DirectTrust™, and EHNAC accredited for HIPAA, HITECH, and GDPR compliance.

7

Scalable and Flexible

Customizable solutions support rapid scaling from pilot to mission-critical deployments.

Why Choose DataMotion?

Our platform is not only a powerful tool for secure data exchange but also a catalyst for digital modernization in healthcare. It is the choice of thousands of healthcare entities, including ambulatory providers and EHR vendors, for its simplicity, security, and compliance in managing health information exchange across the vast DirectTrust™ network.

Transform how your organization handles health data with DataMotion—where security meets simplicity.

ABOUT DATAMOTION

DataMotion's user engagement platform enhances self-service, interoperability and secure data exchange. Our GenAI chat reduces customer support overhead by allowing users to engage with their data. Integrated human assist with live agents and offline specialists enhances user satisfaction. The platform's chat supports unlimited activities such as scheduling and lookups, adapting to evolving needs. Our APIs and connectors are designed for compliance and easy integration with apps and systems, providing interoperability through our population-scale Direct Secure Messaging (HISP), encrypted email and HITRUST CSF® certification. Trusted across demanding healthcare applications, we elevate provider, payer, and patient engagement and efficiency, while reducing cost.
