Integrations

## Seamless, Secure and Compliant Integrations

Businesses face challenges in exchanging files, records and messages seamlessly and securely across their range of employee and customer facing systems. Secure message and file exchange solutions have traditionally contributed to the problem by adding complexity and creating additional silos of data.

Smart, Secure Data Exchange

DataMotion enhances data exchange and user experience with no-code, low-code, and pro-code solutions. Our suite of RESTful APIs provides endpoints for developers to tailor interactions across the organization. The DataMotion Integration Gateway (DIG) is key, integrating secure content into enterprise applications like Salesforce, Genesys, and Microsoft 365, and clinical systems like Epic and Meditech, breaking down data silos and ensuring security.

We support extensive integration with Identity Providers (IdPs), boosting user experience and security. Our approach to zero trust, user authentication, and access management increases productivity and compliance, offering a scalable solution for current and future strategies.

Featured Integrations

GENESYS™

salesforce

Microsoft 365

okta

Outlook

Power Automate

Microsoft Teams

Google Workspace

Discover JenAI Assist™,

our newest addition revolutionizing customer engagement with AI chat, smart forms, expert support, and secure messaging in one seamless solution. Easily integrates with major systems, ensuring secure and flexible deployment to meet your business needs.

Benefits

1

Seamless Integration

DataMotion seamlessly integrates with existing systems, enhancing efficiency and productivity by eliminating the need for complex migrations or disruptions in workflows.

2

Zero Trust Design

Our encryption technologies and stringent compliance standards ensure data integrity and confidentiality, mitigating the risks of unauthorized access or data breaches.

3

Secure Channel

DataMotion offers secure digital channels for chat, email, and file transfers, fostering trust and confidentiality in interactions with customers and partners.

4

Scalability

Our robust architecture allows seamless scalability to handle growing data volumes and accommodate projects ranging from thousands to millions of users, ensuring continuous and reliable service.

5

Certifications and Accreditations

We hold various certifications and accreditations, including HITRUST CSF®, EHNAC and DirectTrust™ accreditation, ensuring compliance with industry regulations covering PII, PCI, PHI, HIPAA and HITECH for the highest security and privacy standards.

ABOUT DATAMOTION

DataMotion is a trusted partner for streamlined and secure digital exchanges within regulated industries, focusing on the financial sector. Our Secure Customer Engagement Platform, augmented by Generative AI, revolutionizes employee and client experiences, facilitating organizations' seamless digital transformation journey.

Our solutions are architected with a zero-trust design to enhance interactions in regulated sectors, built upon our foundational pillars: the Secure Engagement Platform, Generative AI, and human expertise. Seamlessly integrating with a wide range of applications and systems used by our clients, DataMotion enables secure exchange of messages, chats, files, and forms with customers through employees' preferred platforms. These integrations eliminate the need for fragmented solutions, ensuring smooth and secure communications for enhanced customer engagement.
