Partner Program
Your Fast Track to Building a GenAI Practice

Systems integrators and IT service providers are under increasing pressure to offer innovative, AI-driven solutions that not only enhance operational efficiency but also ensure the secure exchange of information. However, building a GenAI practice from the ground up can be daunting. Challenges include integrating advanced AI capabilities into existing customer portals and applications, ensuring data security during exchanges, and differentiating offerings in a crowded market. Without a robust platform, achieving these objectives is resource-intensive, requiring significant investment in development, security protocols, and AI expertise.

What Our Partner Program Offers ⌄

DataMotion's Partner Program provides a fast track for partners to quickly build and enhance their AI practice. By integrating DataMotion's AI-powered Platform as a Service (PaaS) into their clients' portals and applications, partners can offer comprehensive solutions that meet the specific needs of clients.

With access to our JenAI Assist™ solution, provide clients with GenAI chat on their defined data sources and secure exchange for messages, forms, and large documents. The DataMotion Partner Program provides various integration options catering to partners' requirements. The program also offers exclusive benefits and resources, including personalized support to ensure partners have everything they need to succeed.

Enhanced Partner Support

Our Partner Program is built on the philosophy of collaborative growth. We provide more than just solutions; we're strategic partners invested in your journey to success. Benefit from joint achievement, innovation, and dedicated support as we work together to drive business growth and market expansion.

Key Benefits ⌄

Elevate Your Offerings

Seamlessly integrate AI chat, encrypted workflow automation, and secure message exchange into your clients' systems to differentiate your offerings and stay ahead of the competition.

Flexible Deployment Options

Choose from a range of integration methods, including no-code, low-code widget, or pro-code API approaches, to seamlessly integrate DataMotion into your clients' systems.

Effortless Collaboration

Leverage sales and pre-sales support, including demos and personalized assistance, for a hassle-free experience.
Security at the Core

Backed by top industry certifications including HITRUST CSF®, EHNAC and DirectTrust™ HISP/CA/RA, and built with a zero-trust design, we're a trusted partner to fulfill your security needs.

Join us in transforming business interactions and delivering unparalleled value to your clients. Contact our team today to learn more about how DataMotion can accelerate your AI market presence and drive success for your business.

Reduction in contact center calls when implementing our secure message center

ABOUT DATAMOTION

DataMotion is a trusted partner for streamlined and secure digital exchanges within regulated industries, focusing on the financial sector. Our Secure Customer Engagement Platform, augmented by Generative AI, revolutionizes employee and client experiences, facilitating organizations' seamless digital transformation journey.

Our solutions are architected with a zero-trust design to enhance interactions in regulated sectors, built upon our foundational pillars: the Secure Engagement Platform, Generative AI, and human expertise. Seamlessly integrating with a wide range of applications and systems used by our clients, DataMotion enables secure exchange of messages, chats, files, and forms with customers through employees' preferred platforms. These integrations eliminate the need for fragmented solutions, ensuring smooth and secure communications for enhanced customer engagement.
